SUMMARY

Implementation and customer success leader with 8 years across enterprise SaaS onboarding, account management, and operations architecture. Most recently took a field management platform (Fieldwire) from an unused license to the system of record for a commercial subcontractor — 1,000+ tracked work units, verification gates, and a field reporting cadence — then productized the method for outside clients. Repeatable pattern: enter an ambiguous environment, build the structure the platform is missing, and drive adoption at the field level, where it usually dies.

EXPERIENCE

Project Manager | Haven Door Installation — Nashville, TN

Nov 2024 – Present

- Implemented Fieldwire (Hilti) from an unused license to the operational system of record across multiple concurrent commercial projects — 1,000+ tracked openings with opening-level tasks, hardware checklists, and status reporting
- Built automated submittal-to-task tooling that converts a supplier hardware schedule into import-ready project data, cutting per-package setup from a full day of manual formatting to minutes
- Designed receiving and closeout QA/QC gates and a client-facing Build Brief (reconciliation counts, reviewer changes, holds with owners, deployment steps); the verification discipline caught ~\$7,500 in false shortage claims before they became reorders
- Drove field adoption through daily reporting, weekly stakeholder updates, and escalation workflows across field crews, suppliers, and GC teams — diagnosed coordination, not labor, as the primary bottleneck
- Ran the subcontractor side of the money on a 3,100-opening mixed-use project — rebuilt the quote line by line against reissued hardware schedules, flagged items still needing a rate and a six-figure contract-value discrepancy in the GC's portal before enrollment; captured \$15K+ in change-order and T&M revenue on a separate project

Independent Fieldwire Implementation | Nashville, TN

Sep 2026 – Present

- Productized the Haven methodology into a fixed-fee implementation offering — reusable Build Brief deliverable, automated submittal tooling, sanitized demo project — and scoped engagements for two referred contractors (door & hardware; architectural millwork)
- On a 209-opening school project, reconciled the hardware submittal against the client's Fieldwire and surfaced 10 unpinned openings and a dozen reviewer changes that had never reached the field

Account Manager | FreightPOP — Remote

Apr 2024 – Nov 2024

- Owned a \$1M ARR portfolio of 50–100 mid-market clients focused on platform optimization and retention
- Renewed a high-risk account by rebuilding trust and demonstrating measurable value; closed a \$90K expansion
- Supported a 90%+ renewal rate through proactive customer management and cross-functional collaboration

Customer Success Manager | AutoRABIT — Remote

Jul 2022 – Apr 2024

- Led onboarding and strategic success planning for enterprise DevOps and compliance accounts, tying implementation milestones to renewal outcomes (93% renewal rate)
- Managed a \$2M ARR portfolio of 30–40 enterprise accounts, driving adoption and ROI; secured a \$50K expansion by aligning product capabilities with evolving customer goals
- Facilitated QBRs for executive alignment; resolved escalations with 95%+ SLA adherence

Associate Customer Success Manager | Valenz Bluebook (formerly Healthcare Bluebook)

Oct 2020 – Jul 2022

- Led implementation and adoption for new customers on a healthcare cost-transparency SaaS platform; increased user engagement 20% through training and targeted outreach

Freight Broker | Longship

Jan 2020 – Oct 2020

- High-volume outbound prospecting; negotiated and booked freight on a live load board; coordinated carriers and shippers

Business Technology Advisor | Novatech — Nashville, TN

May 2018 – Nov 2019

- Outside B2B technology sales, deals \$10K–\$50K; company-wide incentive trip in first year; Salesforce pipeline management

EDUCATION

B.S., Multidisciplinary Studies — Tennessee State University, 2017

NCAA Division I Men's Tennis — competed at the No. 1 position in the team lineup

Volunteer — Aerial Recovery Group, Nashville, 2023–2024: three tiers of disaster-response training; local Middle Tennessee deployments

SKILLS

Implementation & Onboarding · Workflow Design & Platform Configuration · Field Adoption & Change Management · Construction Financial Workflows (T&M, change orders, quote revisions) · QA/QC Gates · Customer Success & Renewals · Escalation Management · Fieldwire · Salesforce · Submittal-to-Import Automation
